GitHub: github.com/HEMAHARSAN-3

Portfolio: hemaharsan.netlify.app

Location: Coimbatore, Tamil Nadu

PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, SQL, Power BI, Tableau, Pandas, NumPy, and Machine Learning through data analytics and predictive modeling projects. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, KPI analysis, customer segmentation, dashboard development, and extracting actionable business insights from data.

EDUCATION

B.Tech – Artificial Intelligence and Data Science | 2026

Dr. N.G.P. Institute of Technology, Coimbatore

CGPA: 7.7/10

Diploma in Electrical and Electronics Engineering (EEE) | 2023

Nachimuthu Polytechnic College

Percentage: 85.7%

TECHNICAL SKILLS

- Programming & Query Languages:** Python, SQL, Java
- Data Analytics:** Pandas, NumPy, Data Cleaning, Data Preprocessing, EDA, Statistical Analysis
- BI & Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, KPI Dashboards, Reporting
- Machine Learning:** Scikit-learn, Classification, Random Forest, K-Means Clustering, Time-Series Forecasting
- Databases & Tools:** MySQL, PostgreSQL, Microsoft Excel, Git, GitHub, Django, Streamlit

INTERNSHIP EXPERIENCE

Python Django Developer Intern

Pinesphere Solutions, Coimbatore | July 2024 – August 2024

- Developed backend web applications using Python, Django, and PostgreSQL for data-driven solutions.
- Designed and optimized database queries to improve application performance and data management.
- Implemented and tested application features following software development best practices.
- Collaborated with the development team to debug issues and enhance system reliability.

PROJECTS

SALES ANALYTICS & FORECASTING DASHBOARD

Tech Stack: Python, SQL, Power BI, Data Analysis, Forecasting

- Analyzed 50,000+ sales records using Python and SQL to identify sales trends across regions, products, and business segments.
- Developed an interactive Power BI dashboard to visualize sales performance, regional trends, and key business metrics.
- Applied forecasting techniques to analyze historical sales patterns and support data-driven sales planning and decision-making.

CUSTOMER SEGMENTATION & MARKETING ANALYTICS

Tech Stack: Python, Pandas, K-Means Clustering, Power BI

- Analyzed customer transaction data using Python and Pandas to identify purchasing patterns and customer behavior.
- Implemented K-Means clustering to segment customers and identify high-value customer groups based on transaction characteristics.
- Developed Power BI visualizations to communicate customer segments and generate actionable insights for targeted marketing strategies.

HEALTHCARE DISEASE PREDICTION SYSTEM

Tech Stack: Python, Machine Learning, Classification, Feature Selection

- Developed a machine learning classification model to predict heart disease risk using patient medical data.
- Applied feature selection and classification techniques to identify relevant predictive variables and improve model performance.
- Designed an interactive dashboard to visualize model outputs and communicate healthcare insights effectively.

CERTIFICATIONS & ACHIEVEMENTS

- IBM Data Fundamentals Certification
- IBM Artificial Intelligence Fundamentals Certification
- 1st Place – Programming Quiz & Debugging, Lumino 2K24 Symposium, Bannari Amman Institute of Technology
- Participant – National Level 36-Hour HAC-Kathon 2025, Sri Ramakrishna Engineering College
